

Uroš Marušič

Alma Mater Europaea University

Science and Research Centre Koper – Slovenia

Assoc. prof. Uros Marusic, PhD is employed at the Science and Research Centre Koper and Alma Mater Europaea University (Slovenia). He graduated from the department of Cybernetics in Medicine – Biomedical Engineering (2011; University of Ljubljana) and acquired a PhD degree in the study program Applied Kinesiology (2015; University of Primorska). Since November 2020, he has been leading the international Horizon 2020 project entitled TwinBrain (TWINning the BRAIN with machine

learning for neuro-muscular efficiency), worth €0.9 million, funded by the European Commission (ID:952401). As a teenager he was table tennis champion, and he plays saxophone in various blues and big bands.

My Topic for the 19th International Teaching Week:

- 1) Neuroscience of movement in aging and rehabilitation: new ways to improve simple and complex movements
